

STRONG PARTNERS. TOUGH TRUCKS.

Small Trucks. Big Potential.

Hyster Hand Pallet Trucks & More

Our range of Hyster Hand Pallet Trucks, manual stackers and lift tables complete the Hyster offering for your workshop and production site. Buy a Hyster and benefit from our quality and service!

Hyster Hand Pallet Trucks are built to last, with their durable welded steel construction with a high quality, scratch resistant paint finish. Compact design and a tight turning circle make these hand pallet trucks easy to use.

It is all in the details

- Pump stroke with a full 90 degree top to bottom stroke
- “Spring-a-matic” handle automatically returning to the upright position
- Fingertip control of the three position control handle: raise / neutral / lower
- Articulating axle for level transport on uneven floors
- Adjustable push rods for individual adjustment of fork height.
- One piece hangers of iron cast – for greater strength and longevity
- Easy maintenance with pivot points

Economy Line

- Economy line handle
- Frame with reinforced gussets and bulk head.
- Forks with tapered ends for easy pallet entry.
- Pump requires 10 strokes to raise the forks to the maximum lift.
- Steering featuring 180 degree pivot action.

Premium Line

- Premium line handle
- Frame with robotic welds.
- Smooth rounded fork tips, equipped with entry / exit helper rollers.
- Premium pump with Quick-Lift valve: total lift of 190 mm with only 5 strokes for loads up to 200 kg and 10 strokes for loads from higher than 200kg.
- Steering featuring 210 degree pivot action

Your Choice of Frames

- Most popular choice in many European countries: width 520mm and length of 1150mm – ideal for handling Euro palettes
- A selection of broader frames as well as shorter and longer sizes is available.
- All frames in a rugged heavy duty finish – for light weight strength
- Reinforced forks for added strength
- Quality powder coat finish

Your Choice of Pump

- Quality pump design with special lowering valve for controlled rate of descent, and an overload-by-pass
- Three different types of hydraulic pump systems are available:
 - standard pump
 - premium pump
 - Premium pump with Quick-Lift valve
- Two year warranty on the pump

Your Choice of Wheels

Hyster delivers steering wheel (180mm) and load rollers (74mm) with sealed bearings.

The most popular choices are:

Polyurethane steer wheels - nylon rollers

An excellent combination of low noise, low friction and high durability, even on poor floor surfaces. It is non-marking and ideal both for indoor and outdoor use. We recommend to standardize on this premium specification.

Polyurethane (PU) steer wheels and rollers

PU shares many of the characteristics of Vulkollan® (a registered trade mark of BayerAG), and is often referred to as such.

Rubber steer wheels – nylon rollers

Rubber wheels are very quiet but friction and wear are higher than polyurethane. This specification is normally used indoors.

Rubber steer wheels - polyurethane rollers

Rubber wheels are very quiet but friction and wear are higher than polyurethane.

Nylon steer wheels – nylon rollers

Nylon is a harder material, giving extra low friction and wear, but relatively noisy.

Stainless Steel and Galvanized Hand Pallet Trucks

Galvanized Hand Pallet Trucks

All standard hand pallet trucks can be supplied in a galvanized finish, for use in a corrosive environment. Our galvanized truck is supplied with Nylon steer wheels and Nylon load rollers, but other versions are available on request.

Stainless Steel Hand Pallet Trucks

These hand pallet trucks are completely made of stainless steel AISI 304 and therefore meet hygiene standards in the food processing industry. They are also resistant to aggressive environments in the chemical industry.

Weigh Scale Hand Pallet Trucks

- Mobile weighing offers many advantages: you can efficiently determine the weight during the loading and unloading.
- The battery charger is included.
- The weigh scales measures with an accuracy ± 2 kg

More Choice

3 tonne Hand Pallet Truck
With nylon steer wheels and double nylon rollers

Hand Pallet Truck for cold stores
For use in cold stores up to -35°C

Hand Pallet Truck with Dual Brake System
Service brake and parking brake for use on slopes or loading platforms

Scissor Lift Hand Pallet Trucks

The high lift trucks (or scissor lift) combine the manoeuvrability of a hand pallet truck and the lifting function of a lift table. The high lift trucks are equipped with stabilizers, which touch the floor when the lift height exceeds 400mm.

Manual Lifting Scissor Lift

The hydraulic pump is equipped with a valve, which provides two lifting speeds:

- high lifting speed without load on the forks
- normal lifting speed with load on the forks.

Electric Lifting Scissor Lift

The hydraulic pump is operated electrically with the power provided by a 12 volt battery.

Manual Stacker

Our manual stackers have a fork over straddle leg design are operated using a manual hand or foot control. We offer a 1000 kg capacity stacker with a safety screen for operator protection. The stacker combines ergonomic design a compact build for congested areas. Solidity is assured by its steel construction.

MODEL: EMS10-16	
Capacity (kg)	1,000
Lift Height (mm)	1,600
Load Center (mm)	600
Lowered Fork Height (mm)	90
Fork Length (mm)	1,100
Fork O.D. (mm)	550
Overall Length (mm)	1,640
Overall Width (mm)	740
Overall Height (mm)	2,050
Weight (kg)	230

Available from July 2011: Lift Tables

We broaden our offering of material handling equipment for workshops and light weight production applications with lift tables; They will be available in capacities of 150kg to 800kg and various lift heights.
